

## Company profile

Airtel ATN is an independent supplier of data communication software for the aviation industry, in particular the ATN (Aeronautical Telecommunication Network). Airtel ATN has been active in ATN since 1993 and is an international leader in the development of ATN communications software.

Airtel ATN's solutions focus on standards compliance, performance, quality and certification in line with best industrial practices. Airtel ATN provides software products, engineering services and solutions to aerospace users and industries all over the world.

### Airtel ATN Differentiators

- Dedicated to the ATN since 1993
- The only company with air and ground systems live
- Operation software deployed for over 10 years
- Independent – integrates with all manufacturers

### Products

Airtel ATN provides a complete range of ATN compliant products for operational use and for test/validation including:

- Data Link Server/Front-End Processor
- ATN Compliant VDL Mode-2 Mini-VDRs
- Air/Ground and Ground/Ground Routers
- VDL Mode 2 Ground Stations
- Airborne ATN Router
- Airborne ATS Application Support Package
- Airborne and Ground Test/Validation Suites
- Multi-Aircraft Simulators

### Solutions

Airtel ATN provides tailored solutions for a wide range of airborne and ground systems which are in operational use on AIRBUS and Boeing Airliners, VDL Networks and Air Traffic Control Centres.

### Customers

Airtel ATN works with the world's leading aviation and space companies:

#### Air Navigation Service Providers

- EUROCONTROL
- ENAV
- NAV Portugal
- UK NATS

#### Air/Ground Communication Service Providers

- ARINC
- SITA

#### Avionics

- Rockwell Collins
- Honeywell
- Spectralux

#### ATC System Integrators

- INDRA
- SELEX Sistemi Integrati
- Raytheon

#### Equipment Manufacturers

- ITT Systems
- Selex Communications

#### Space Industries

- ESA
- NASA
- INDRA Espacio
- Kongsberg
- Thales Alenia Space
